High quality light and design

- Get the right lighting angle

Highlights

Installation free dimming

Experience guaranteed smooth dimming with Philips Hue. Not too bright. Not too dark. Just right. No need for wires, an electrician or installation

Light for your daily routines

Light influences our mood and behavior. Philips Hue can help you to customize your daily routines into moments you can enjoy. Skip your morning coffee and get ready for the day with cool, bright white daylight that helps to energize your body and mind. Stay focussed with finely tuned bright white light. Or put your feet up and relax with a soft glow of white light for the perfect end of the day.

Create your ambiance

Set the right ambiance for any moment and decorate your home with warm to cool white light. Enjoy different styles throughout the year, no matter if it's the crisp white light reminding you of a spring breeze, the warm white light of a summer sun, or the ice cool daylight of winter.

Dimmer switch (included)

With the battery-powered dimmer switch for Philips Hue, you can control the light of your white ambiance lamps easily. Cycle through the 4 different light scenes by simply pressing the on-button, dim the light up or down and settle for ease of use. The dimmer switch can be placed anywhere in its small and elegant dock and needs no wiring. Use as a remote control or as a light switch against the wall and enjoy the right light recipe for every moment of your day. You can add up to 10 Hue lights to one dimmer switch.

Wake up and go to sleep

Philips Hue will help get you out of bed the way you like it, helping you start your day feeling refreshed. The light brightness increases gradually mimicking the effect of sunrise and helps you wake up naturally, instead of being woken up by the loud sound of an alarm clock. Start your day, the right way. In the evening, the relaxing warm white light helps you to unwind, relax and prepare your body for a good night's sleep.

Get the right lighting angle

The movable head of this floor light is designed to direct the light where you need it most.

Full control with Hue bridge

Connect your Philips Hue lights with the bridge to unlock the endless possibilities of the system.

Smart control, home and away

With the Philips Hue iOS and Android apps you can control your lights remotely wherever you are. Check if you have forgotten to switch your lights off before you left your home, and switch them on if you are working late. Connection with the Philips Hue bridge required for this functionality.

Timers for your convenience

Philips Hue can make it seem like you're home when you're not, using the schedule function in the Philips Hue app. Set the lights to come on at a pre-set time, so the lights are on when you arrive home. You can even set rooms to light up at different times. And of course, you can let the lights turn off gradually in the night, so you never have to worry whether you've left any lights on. Connection with the Philips Hue bridge required for this functionality.
